

AN AMAZING NEW BREAKTHROUGH

Destined To **REVOLUTIONIZE**
THE FINE WINE INDUSTRY

*Certify the Quality of Fine Wine
Without Opening the Bottle!*

Developed by Scientists at the
University of California - Davis,
THE WINE NMR

IS THE ONLY MACHINE IN THE WORLD
that can determine if a wine is pristine, tainted
or somewhere in-between, without damage to
the bottle, cork, seal, label or the wine. This
remarkable technology can also certify a wine's
authenticity.

NMR Certification takes the guesswork out of
fine wine collecting and trading for connoisseurs
and merchants.

Look for the **NMR Certification** before you
buy at auction.

**Testing & Certification Available
by Appointment...
Results Guaranteed!**
